Meterpreter : module « stdapi »

- Interactions réseau
  - `ipconfig` : liste les interfaces réseau et leur configuration
  - `Route` : informations sur les routes du système
    - `route [list]`
    - `route add [sous-réseau] [masque] [passerelle]`
    - `route del [sous-réseau] [masque] [passerelle]`
  - `portfwd` : création de tunnels au travers de la cible
    - Fonctionne comme un tunnel SSH
    - `portfwd list`
    - `portfwd add -l <port-source> -r <ip_destination> -p <port_destination>`
    - `portfwd del -l <port-source> -r <ip_destination> -p <port_destination>`

Meterpreter : module « stdapi »

```
meterpreter > run
